

In Progress pres. Teya

Bio

Pavel Rad'ko also known as In Progress, Teya and Pavel Pryde started producing in 2001 using ReBirth 2.0. Then he discovered Fruity Loops 1.0 which charmed him with its simple and multifunctional interface. Years have passed in sound training; a collection of samples and VST synths was growing up by that time. The first tracks sounded like melodic psy-trance inspired from Yahel's album tracks ("For The People").

Pavel left his hometown in 2003 and moved to Saint-Petersburg to continue his studies. He met a lot of new people who were in contact with trance music. The quality of his productions improved and gave him the impulse to continue. In 2005 two of his remixes have been spinned at the russian FM Radio Show named "Trancemission". That was the starting point for serious productions. The following releases appeared later on.

His productions have been supported by Armin Van Buuren (A State Of Trance), Above & Beyond (Trance Around The World), Markus Schulz (Global DJ Broadcast), Tiesto (Clublife), Ferry Corsten (Corstren's Countdown) and also by Mike Shiver, Marcus Schossow, Matt Darey, John Askew, Mark Pledger and many other good DJs.
